KYOSHO™ USA

WORLD'S FINEST RADIO CONTROLLED MODELS

Excitement that goes beyond the edge... Kyosho, the world's finest radio-control models

Pilot your own helicopter. Race a Formula 1 champion. Streak across the waves in a powerful deep vee. With Kyosho radio-control (R/C) models, you can do all of these...and more!

In movies and on TV, you've often watched R/C vehicles perform risky stunts—and probably never realized you were seeing models. The R/C hobby's true-to-life action has made it enormously popular with real pilots and racers.

By staying on technology's cutting edge, Kyosho takes radio-control far beyond the R/C toys sold in department stores. Kyosho model kits lead you through a building and learning adventure. You know your model inside and out...how to perform maintenance, how to make repairs, and how to increase its power with optional parts.

Kyosho's exciting line-up includes the perfect model for you.

No manufacturer offers a better selection of R/C models than Kyosho. Competition racers can hit their peak with the 1/10 scale Triumph 2WD and Lazer

ZX-R 4WD, or 1/8 scale Inferno 4WD. Kyosho's Concept helicopter series includes the perfect machine for every skill level. The award-winning Raider Pro buggies offer just enough challenges to give new modelers a sense of real accomplishment.

In fact, Kyosho R/C model kits make a perfect family project. You work together to build a model—then share the success with every race or flight.

Of course, if you just want to get into action fast, you can choose from Kyosho's many pre-built models. They're engineered with the same sophistication that makes Kyosho kits proven winners.

Fast, friendly customer service.

Kyosho products are distributed in the U.S. exclusively by Great Planes Model Distributors, the world's largest R/C company. Great Planes is located right in the nation's heartland, and its excellent record of fast, friendly customer service is yet another reason why Kyosho R/C models are your best choice. With the help of your Kyosho dealer, you'll always have quick access to parts, so you can maintain and upgrade your model for many years of R/C action. You have total product and customer support with Kyosho and Great Planes.

For a close look at any of the Kyosho models listed in this catalog, visit your local hobby dealer. He will help you with everything you need to get started in R/C...the hobby that takes excitement beyond the edge.

ENTRY

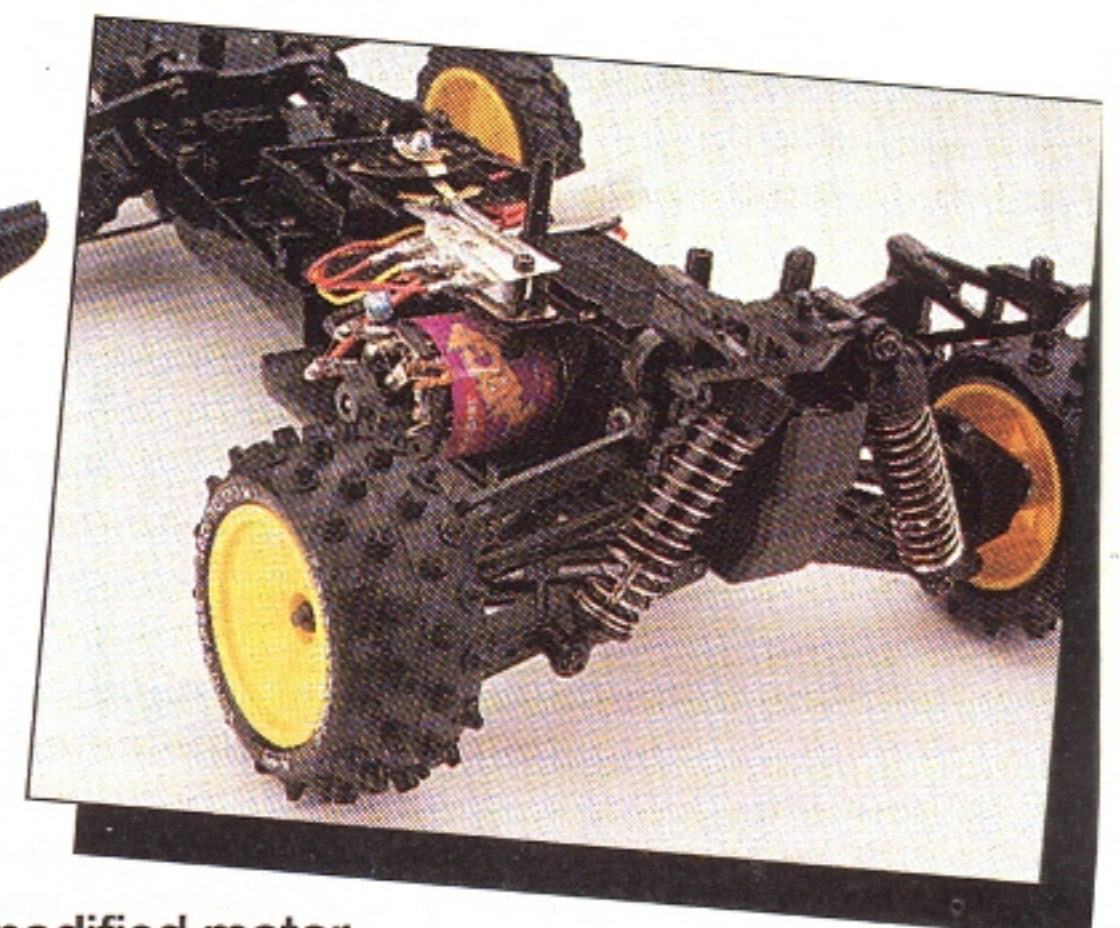

Raider Pro™

No. 3197H
KYOC0186
Beginner

- Durable 2WD design tackles brutal off-road tracks with ease

Modelers as young as 8 years old, with a little adult supervision, can successfully build and race the Raider Pro—twice named the best R/C buggy for new hobbyists by a major hobby industry magazine. Detailed instruction manuals make assembly easy and rewarding. And all Kyosho models feature the built-in durability needed to hang tough during “driver's ed.”

Turbo Raider Pro™

No. 3164H
KYOC0188
Beginner

- Hopped up with oil-filled shocks, ball bearings & a powerful modified motor

1/10 SCALE COMPETITION

Anticipation races through the R/C industry every time Kyosho introduces a new competition car. The Triumph 2WD is no exception. It combines technical breakthroughs, such as a revolutionary transmission, with features developed for easy maintenance. The entire tranny can be removed by taking out just five screws! At the 1991 1/10 Scale Off-Road World Championships in Detroit, Kyosho's Lazer ZX-R 4WD claimed 4 of the top 10 A-Main finishes...and set a new track record by turning a 12-lap 5:04.99 time. Since the 1991 World Championships, the Lazer ZX-R has captured two national events and has shown that this competition-ready kit, out of the box, is the dominant 4WD electric buggy available!

Lazer ZX-R™

- Winner of 1991 ROAR Nats and 1992 Winter Nationals

SCALE CARS

Kyosho's 1/10 Scale Series 2WD race cars' incredible detail makes them perfect for displaying on your desk, bookshelf or mantle. Plus each car comes with Kyosho's powerful Mega Outlaw Stock motor, heavy-duty rotary speed control, scale inboard shocks and a lot more. With these hot performers, you're ready for exciting R/C action anytime...anywhere!

Modeled after the most famous, most desirable exotic production cars in the world, Scale Series 2WD street cars offer precise detail plus exciting performance. The chassis is adapted from Kyosho's World Champion Ultima buggy. The detailed interior of the "Super Scale" Lamborghini Diablo 4WD makes this one of the most realistic R/C models ever created! All include a LeMans Stock 05 motor and rotary speed control.

When Kyosho introduced the Big Brute over five years ago, it marked a turning point in R/C truck design. Finally, somebody was designing monster models truck-tough from the ground up—not just slapping a truck body on a car chassis. The Big Brute remains a big success. And it's been joined by a whole fleet of electric-powered racing trucks and car crushers...all with the size, power and realism to conquer your favorite stomping grounds.

Outlaw Raider™ Racing Truck

No. 3161H
KYOC0190
Beginner

- Incredible speed, handling and durability
- Can be track-ready in only 8 hours!

- Authentically recreates the original's multi-link, live axle, rear suspension, independent front suspension and shocks
- Incredible scale appearance includes windshield wipers, door mirrors...even authentic tread patterns and sidewall details
- Three diff design offers optimum traction on any surface
- Excellent as a tow vehicle for R/C cars and boats

BOATS

If you enjoy racing cars and buggies, you'll also love streaking across your nearby lake or pond with Kyosho's exciting Hurricane catamaran or Viper and Jet Stream offshore deep vees. They're fast, maneuverable, brilliantly trimmed and ready for racing soon after you open the box.

Kyosho's R/C sailboats are an ideal way to unwind. Standing over five feet tall, their broad, white sails cut gracefully across the water—while from the shore, you control rudder and sail movement to direct their quiet paths.

All Kyosho boats pictured come with a display stand so you can enjoy their authentic looks indoors and out.

Boat	Length	Beam

HELICOPTERS

In just three years, Kyosho Concept Helicopters have become the favored few at flying fields everywhere... and no wonder. The looks are sleek. The action's fast-paced. And the choices are greater than ever. The Concept 30 set the stage: easy to assemble, set up, maintain and very user-friendly, it turned thousands of car, plane and boat R/Cers into Concept converts almost overnight. Its performance has made it a star...and its popularity has led to a whole family of all-star performers: the high-tech Concept 30 SR; the impressive Concept 60; the electric-powered EP Concept; and now, Concept 10, the mini-heli bred for airshow aerobatics.

Helicopter	Length	Weight	Rotor Dia.
Concept 60	47.25"	9.9 lbs.	60"
Concept 30SR	40.6"	5.5 lbs.	47.25"
Concept 30DX	39.8"	5.5 lbs.	45.7"
Concept 10	33.9"	3.1 lbs.	38.2"
EP Concept	31.9"	2.6 lbs.	35.9"

Kyosho's Concept Total Support Program

To help modelers enjoy the greatest success with their Concept helicopters, Kyosho has developed the Concept Total Support Program. Every Concept flier can take advantage of services no other manufacturer provides:

- A Helicopter Hotline staffed by Concept fliers who are always ready to answer questions and offer helpful tips: (217)398-2834
- Parts availability that's second to none
- A complete line of fuselages and accessories
- A free bi-monthly newsletter to all Concept owners
- Detailed parts brochures with pictures for easy ordering
- Easy-to-follow instruction manuals

No. 3546
