

BREAKTHROUGH

HISTORY OF THE LEGEND

For nearly ten years GMP has been creating innovative developments in RC helicopters.

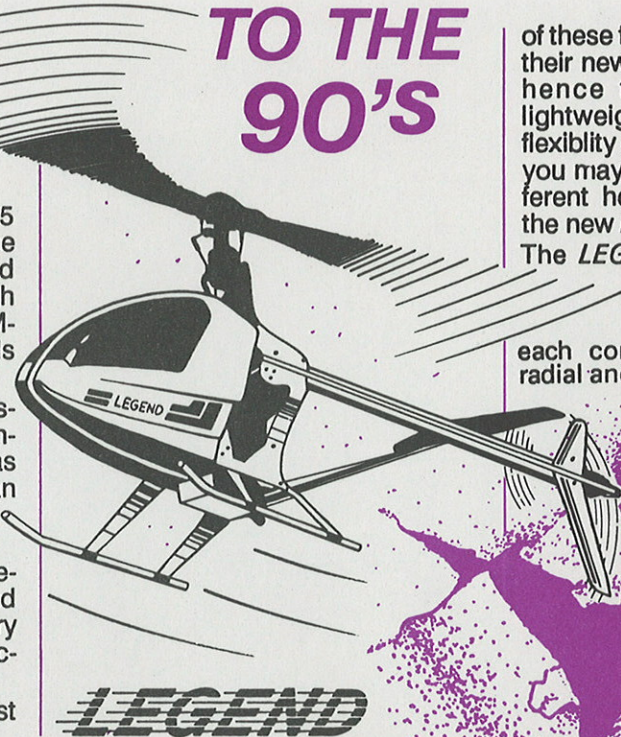

We produced the first U.S. made, 25 powered helicopter - CRICKET, the first small scale HUGHES 300C, and the first range of lightweight, high performance contest ships, COMPETITOR and COBRA - all legends ahead of their time.

Now having surveyed all the possible new features which could be included in a new helicopter, GMP has developed another two firsts - an easy to fly flybarless head and a simple belt drive tail system.

GMP's innovative features have become legendary in the industry and are still being copied in the very latest helicopters by other manufacturers.

GMP has now decided that the best

TO THE 90's

of these features will be preserved in their new helicopter for the 1990's - hence the name **LEGEND**. A lightweight, simple design with a flexibility of features arranged so that you may have a choice of eight different helicopters all created from the new **LEGEND** system.

The **LEGEND** kit is complete with many features not seen before in an RC helicopter kit. The tail blade holders each contain three bearings - two radial and one thrust - An industry first.

LEGEND'S main shaft

has two shielded radial bearings PLUS a thrust bearing to take the weight of your helicopter in the high "G" maneuvers and autorotations. Another first.

LEGEND also contains many pre-assembled units such as the servo tray and main rotor head. Just bolt them on! The tail surfaces are of a sophisticated glass-faced laminate which is ultra-lite and ultra-strong. The instruction manual is in four sections and uses a new and unique combination of text and pictures in consecutive stages and steps to lead you easily to your first flight. The controls section enables you to set up your helicopter very easily and a pitch gauge is included to ensure the accuracy of this step. The main rotor blades are finished, sanded, slotted, accurately matched and ready to ballast and cover.

1988 U.S. NATIONALS

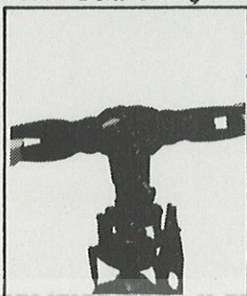

LEGEND'S also placed 3rd, 4th and 7th in intermediate class and 6th in FAI 3C. Other GMP helicopters were flown to win many other places including 4th and 5th in FAI 3C classes.

THE "LEGEND" RC HELICOPTER SYSTEM
AN RC HELICOPTER DESIGNED TO BE CUSTOMIZED
BY YOU, FOR YOU

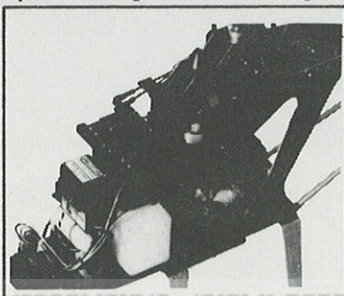

The sleek, light, fast and purposeful look of **LEGEND**
LEGEND comes in for a landing - Look, no flybar

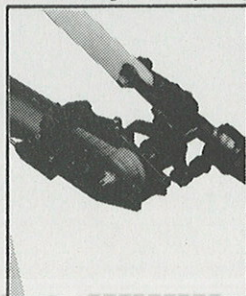

LEGEND's new flybarless head - Delta 3 hinge

LEGEND's control system & engine drive is ... legend

LEGEND's belt drive tail has an elegant simplicity
