

SUPER LEGEND STANDARD FEATURES

Super Legend II :

All of the standard features of the Super Legend with these features:

G-10 main frames and servo tray

One piece fiberglass canopy

SPECIFICATION:

9 to 9.5 pounds

60 " main rotor disk

10 1/2 " tail rotor disk

9.3:1:4.66 gear ratio with 5.2 tail rotor available

All parts TRULY MADE IN THE USA

Self aligning clutch

Custom machined Fan hub

Dual ball bearing support clutch bell

Heavy duty clutch liner

CNC machined rotor head utilizing 6061-T6 aircraft grade aluminum, 12L14 steel and triple ball bearing blade grips with oversize thrust bearings.

High strength steel pitch arms

Positive or negative delta rotor head set-up

Fully adjustable rotor head dampening

Main rotor head pre-built

Thrust bearing incorporated into bearing block

G-10 main frame and servo tray

G-10 vertical and horizontal fin

Hardened main shaft

Four ball bearings in auto rotation unit

Aileron, Elevator, and collective full ball bearing supported

Machined washout, and swashplate assembly

Belt driven tail rotor (Kevlar strands)

Steel one piece tail rotor hub

Triple ball bearing tail rotor blade grips

Tail rotor mounts on left or right side of helicopter

Carbon fiber Boom Braces

Carbon fiber tail-rotor push rod with steel ends

High performance symmetrical main blades

High performance tail-rotor blades

High quality ball bearings and hardware (12.9)
